

ABSTRACT

Lengkung Langit Dua is one of the new tourist attractions in Bandar Lampung, opened in 2021 with the concept of cool natural nuances and sea views as one of the main photo spots. Nearly 70% of the Lengkung Langit Dua area is still filled with trees. This tourist attraction has a vision that aims to empower local communities. Writing this final project aims to describe the tourist attraction of the Lengkung Langit Dua and describe how the forms of community empowerment in the Lengkung Langit Dua tourist attraction. The types of data used are primary data and secondary data. Data collection methods used are observation and interview methods. The data analysis method used is descriptive qualitative method. The results of writing this final project show that community empowerment in the Lengkung Langit Dua tourist attraction is contained in the Five CBT Principles developed by Suansri (2003), namely economic, social, cultural, environmental and political. The motivating factors in community empowerment in Lengkung Langit Dua are in the form of qualified natural resources and technological developments. The inhibiting factor in community empowerment in Lengkung Langit Dua is the lack of human resources who
