Microalgae oil extraction method for biodiesel production has been developed in order to get extraction efficiency. Generally, damaging the cells can be used to increase extraction results. One of the methods to damage cells is using high voltage electricity. The purpose of this study is to determine the effect of electric field strength and exposure duration to the lipid yield of *Nannochloropsis Oculata*. The method used was to treat the *Nannochloropsis* suspension using high voltage electricity with field strength of  $4.3 \text{ kV.cm}^{-1}$  -  $34.8 \text{ kV.cm}^{-1}$  for 10 seconds - 30 seconds and continued chemical extraction. The results showed that giving electric field exposure to microalgae suspension can increase the yield of microalgae oil. The use of high voltage electrical exposure on microalgae suspension and continued by chemical extraction can raise the yield of oil obviously

**Email Body:**

Dear Dr. Z. H. Malik,

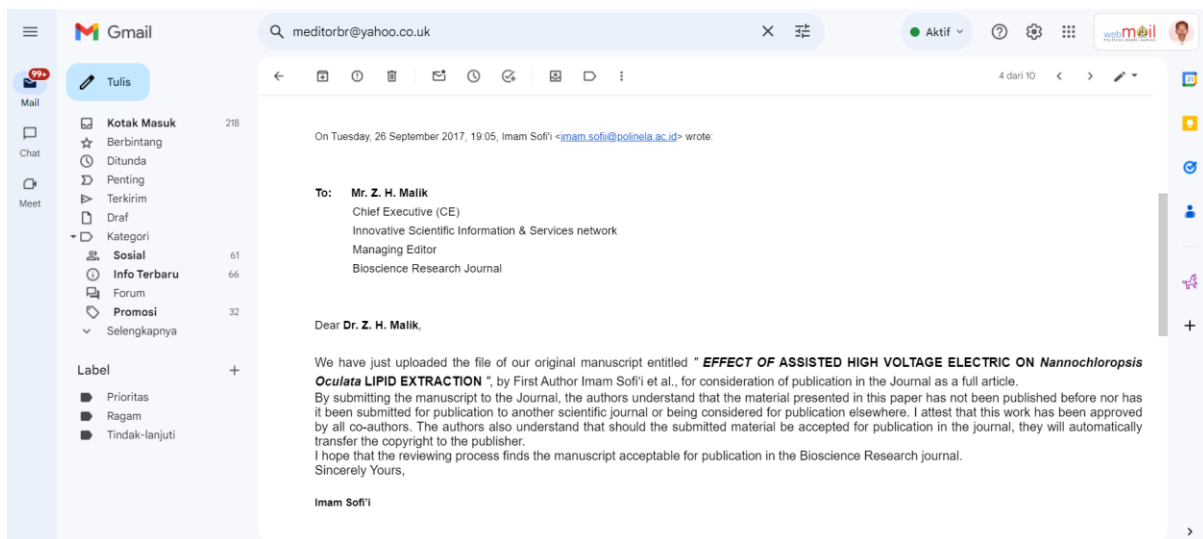

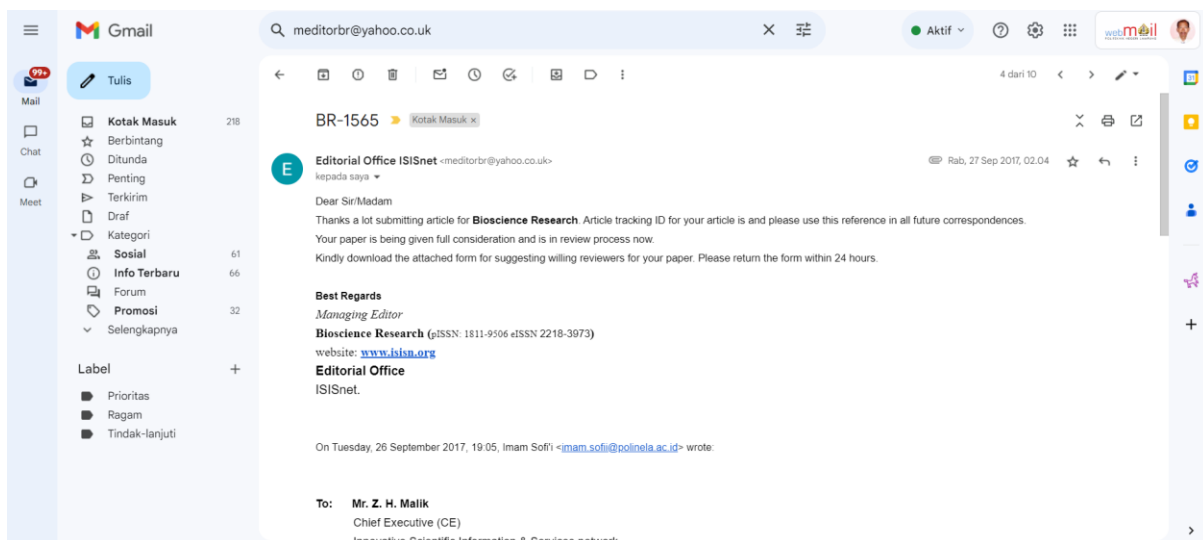

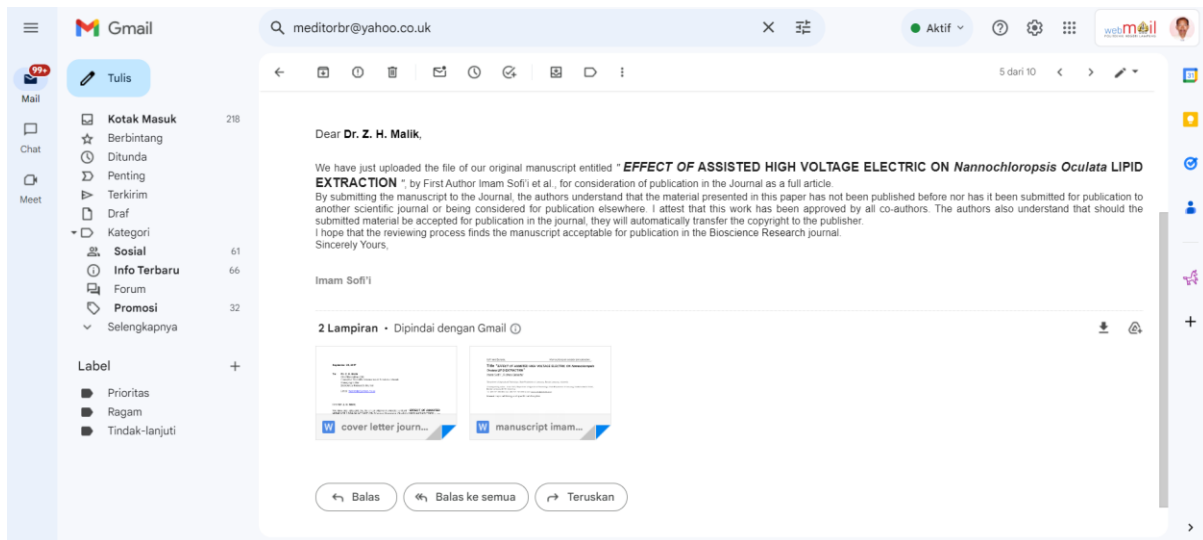

We have just uploaded the file of our original manuscript entitled "**EFFECT OF ASSISTED HIGH VOLTAGE ELECTRIC ON *Nannochloropsis Oculata* LIPID EXTRACTION**" by First Author Imam Sofri et al., for consideration of publication in the Journal as a full article.

By submitting the manuscript to the Journal, the authors understand that the material presented in this paper has not been published before nor has it been submitted for publication to another scientific journal or being considered for publication elsewhere. I attest that this work has been approved by all co-authors. The authors also understand that should the submitted material be accepted for publication in the journal, they will automatically transfer the copyright to the publisher.

I hope that the reviewing process finds the manuscript acceptable for publication in the Bioscience Research journal.

Sincerely Yours,

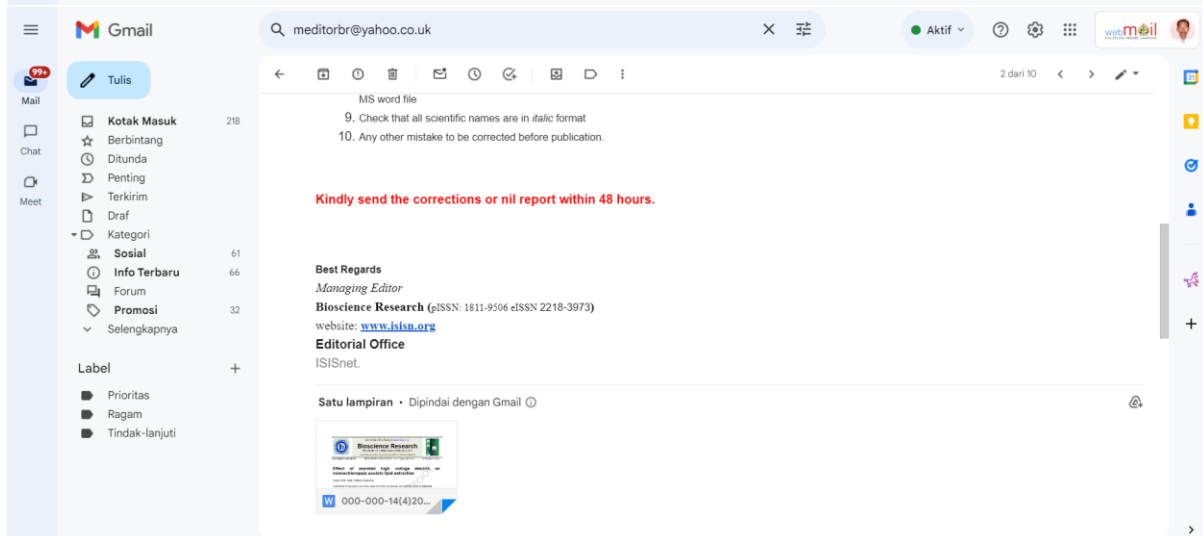

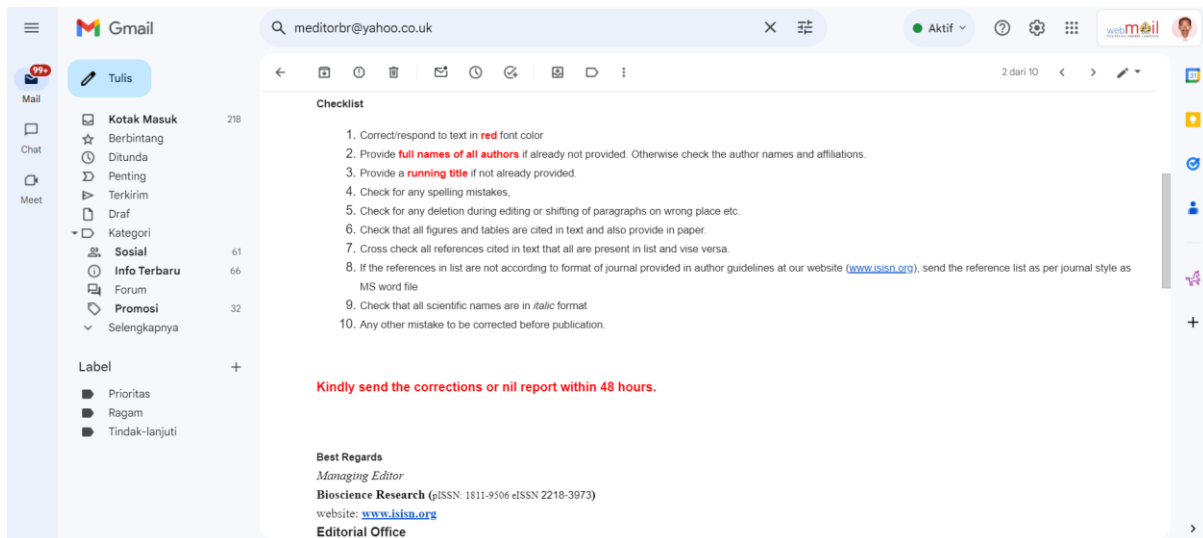

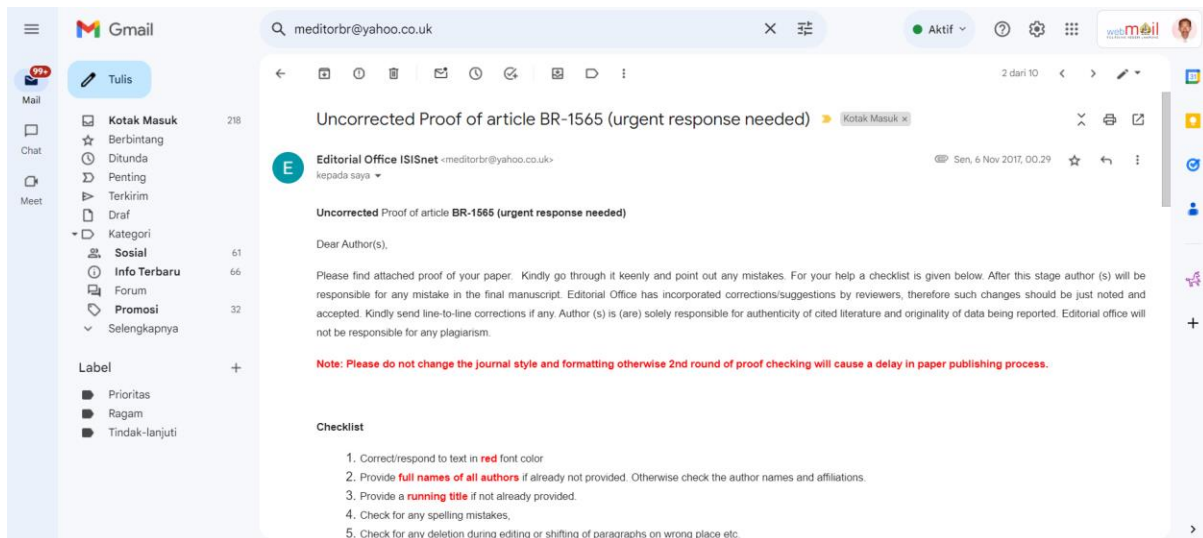

Imam Sofri

Dear Author (s),

Congratulations!

Please find attached PDF of your paper published in the **Bioscience Research**. The PDF of article is for unlimited off prints of your paper for your personal use. The paper is also available online at [www.isisn.org](http://www.isisn.org) Please send the PDF of your paper to all the scientists in the research field and try to circulate it as much as possible. High citations of your paper will defiantly improve your as well as journal Impact Factor.

We are thankful to you for choosing our journal for publishing your innovative research findings. I hope that in future you will continue publishing your quality research findings with us.

Note: As journal is being considered for inclusion in ISI science citation index and several other databases, try to circulate your paper to maximum researchers working in this research area. You may send the PDF of your paper to all contacts in your email that will increase the chance of its citation. You must add your paper to to your profile at Research gate, Medley, linkedin, Scopus, Google Scholar etc.
