## **RINGKASAN**

Penelitian ini bertujuan untuk menganalisis Performa Produksi Ayam Petelur di Kandang *Closed House* Layer 4 di PT Sumber Protein Unggul, Farm Rama Oetama, Kec. Seputih Raman, Lampung Tengah. Penelitian berlangsung pada bulan Desember 2023 hingga Januari 2024 bertempat di PT Sumber Protein Unggul, Farm Rama Oetama, Kec. Seputih Raman, Lampung Tengah. Metode yang digunakan ialah metode kuantitatif dengan teknik pengambilan data dilakukan dengan observasi dan pemeliharaan ayam petelur. Performa Produksi Ayam Petelur di Kandang *Closed House* Layer 4 PT Sumber Protein Unggul dapat disimpulkan bahwa pemeliharaan ayam petelur menggunakan kendang *Closed House* dapat digunakan sebagai upaya untuk memaksimalkan produktivitas ayam petelur yang diukur dari indeks kenyamanan, sangat nyaman, HDP, HHP diatas standar, FCR sesuai standar dan rendahnya angka mortalitas.

Kata kunci : Ayam Petelur, *closed house*, performa

**ABSTRACT**

This study aims to analyze the production performance of laying hens in closed house layer 4 di PT Sumber Protein Unggul, Farm Rama Oetama, Kec. Seputih Raman, Lampung Tengah. The research was conducted for one month from December 2023 to January 2024. The methods that used who a quantitative method with data collection techniques carried out by observation from the research it can be concluded that rearing laying hens using closed house can be used as to maximize the productivity of laying hens measured by comfort index (very comfortable), HDP, HHP above standard, FCR is within the standard and mortality rates are low.

**Keywords:** Closed House, Laying Hens, Performance
